

## AN OPEN-AND-SHUT CASE FOR CREATION

*“And, behold, I, even I, do bring a flood of waters upon the earth, to destroy all flesh, wherein is the breath of life, from under heaven; and every thing that is in the earth shall die” (Gen. 6:17).*

Evolutionists hate the very idea of the worldwide flood because they know that such a catastrophe would cause the Earth to appear to be much older than it truly is. And without those long ages of time, evolution becomes an impossibility.

Surprisingly, dead clams, like many other sea creatures have much to tell us about the flood of Noah’s time. Clams are known as bivalve mollusks. They have two valves that are hinged together. They can close their shells very quickly to protect themselves from predators. When a clam dies of natural causes, the clam releases its grip on its shell, and it opens within a matter of hours. But if a buried clam shell is found shut tight, it shows that the clam was buried suddenly.

We mention this because fossil clam graveyards are found all over the world containing millions of clams with their shells shut tight. This speaks to us of a catastrophe that buried billions of clams very quickly — in other words, the worldwide flood of Noah’s time. Since these fossil clam beds are found all over the world — and are often high above their natural habitat — it can only mean that the biblical worldwide flood is a fact of history.

Now, if the Bible is right about the worldwide flood, the Earth is much younger than it appears to be, so there simply isn’t enough time for evolution to take place.

Graveyards of closed clams have given us an open-and-shut case for biblical creation!

## DIGGING UP THE DIRT ON FRAUDULENT FOSSILS

How far will scientists and museums go to get people to believe in the theory of evolution? As scientist Carl Werner reveals in his book and on his web page, *Evolution: The Grand Experiment*, they will readily fabricate fake fossils and pass them off as real.

Dr. Werner said at his website, *“Whales with four legs, walking on land, are currently considered one of the best fossil proofs of evolution.”* But after interviewing the two scientists who reconstructed the fossils of the three famous walking whales, *Rodhocetus*, *Pakicetus* and *Ambulocetus*, he concluded that the scientists created false models of these skeletons and skulls and passed them off as real to the biggest and most respected museums in the world.

In a Generations Radio interview, he said, *“If you go to the largest museums in the world right now, there’s fabricated fossil after fabricated fossil, where they’ve attached whale body parts to walking animals and said, ‘Oh, look, we have walking whales.’ These are on display currently, and I have interviewed the scientists who put the whale body parts onto four-legged animals, and they admitted to it.”*

Dr. Werner predicts that someday the fossil fakes will be quietly removed from museums. But for now, these fakes will deceive those who go to museums and web sites where they will learn about “whales with legs”. This is yet another reason why those of us with the truth must not remain silent but must share the truth with all who will listen.
